- Preliminary & Final Major Subdivision & Site Plans
- Landscape Architecture
- Environmental Permitting
- NJDOT Access Permitting

Project Description:

A 43,000 square foot state of the art facility for Audi sales, service & parts on a five acre site. This building was known as its "Light Tower" representing it as a flagship dealership in the area. The project required DOT Access to Route 1 and DEP wetland permitting. A storm water basin was designed onsite for complete recharge. In addition, power and water transmission lines traversed the site and had to be protected during construction.
