- Construction Layout

Project Description:

Omland Engineering Associates has worked on the development of TD Bank North (Commerce Bank) sites in northern New Jersey. While each site presents its own challenges, the program for the facilities remains the same. TD Bank North branches are well over 4,000 square feet in size. The focus of the designs were to be customer friendly. Challenges of the bank for our site designers included providing a minimum of four drive-thru windows and a minimum of 30 parking spaces. Completed bank branches are now operating in East Hanover, Pompton Lakes and Rockaway, New Jersey.
