

## ANDERSON PARKWAY LOPEZ ROAD CARLSON PARKWAY & CHASE PLACE

### Road Reconstruction Project

Cedar Grove, Essex County, NJ

CLIENT: Township of Cedar Grove

#### Services Provided:

- Existing Conditions Surveying
- Roadway/Drainage Design
- Bid Documents

#### Project Description:

This project involved the complete reconstruction of and drainage improvements to 7,500 linear feet of roadway consisting of four (4) individual streets in a single neighborhood. The design of this reconstruction was complicated by the flat topography of the area and the limited pitch of many front yards of the adjoining residences. Our efforts also involved coordination with residents to address repairs to paved driveways/walks and other privately installed improvements. Full construction documents were prepared for bidding. This project was successfully completed and represented a continued investment into infrastructure maintenance and rehabilitation by Cedar Grove, supported in part by the firm's efforts.
