

GARFIELD AVENUE

Road Reconstruction Project

Madison, Morris County, NJ

CLIENT: Borough of Madison

Services Provided:

- Existing Conditions Surveying
- Roadway/Drainage Design
- Bid Documents
- Construction Observations

Project Description:

This project involved the reconstruction of 4,100 feet of this collector street including drainage improvements, profile modifications, the installation of granite block curbs and landscape restoration. This project was constructed in two phases, each phase containing approximately half the overall project. The design plans and specifications were prepared in accordance with NJDOT Local Aid requirements for public bidding. Our efforts also involved coordination with residents to address driveway, drainage and other specific issues. This project was successfully completed and represents a continued investment into infrastructure maintenance and rehabilitation by the Borough of Madison, supported in part by the firm's efforts.
