Hanover Twp., Morris County, NJ

CLIENT: Renaissance at Hanover, LLC

Services Provided:

- Boundary/Topographic Surveying
- Concept Study
- Preliminary & Final Site Plans
- Landscape Architecture
- Permitting
- Construction Stakeout

Project Description:

The developers of an adjacent mixed use complex constructed two fields for baseball and softball to be used by the Township of Hanover to augment their existing recreational facilities. Working closely with the Township and their Recreation Department, we designed two regulation sized fields, with complete irrigation systems, lighting and ancillary amenities. This also included a parking lot and utility connections for future concession facilities. The perimeter of the athletic fields was attractively landscaped to provide a buffer to the adjacent roadways. We also obtained the necessary approvals for construction of these fields and worked with the Township during construction to gain their acceptance of the fields.
