CONSTRUCTION DOCUMENTS

Township of Bloomfield, Essex County, NJ

CLIENT: Bloomfield College

Services Provided:

- Topographic Surveying
- Concept Study
- Site Design
- Landscape Architecture
- Permitting
- Construction Stakeout

Project Description:

Bloomfield College is an accredited four year Liberal Arts college that was founded in 1868 and currently enrolls over 2,300 students. Omland Engineering Associates is providing engineering, planning, landscape architecture and surveying services to the College for a number of renovations and enhancement projects on campus. These services are provided as part of a continuing on call contract with the college. Completed projects to date include the renovation of the Liberty Street Residence Hall, plaza improvements at the Science Building, and general campus service and pedestrian improvements at the Library, Westminster Hall, Richards Hall and Voorhees Hall. We have worked closely with college staff and the project architect to provide on schedule and on budget construction documents for public bidding.
