

BANCROFT NEUROHEALTH

Traffic & Parking Study

Haddonfield, Camden County, NJ

CLIENT: Bancroft NeuroHealth

Services Provided:

- Traffic Study

Project Description:

Bancroft NeuroHealth is a school for children suffering from neurological disorders and development disabilities located on a residential campus in the Borough of Haddonfield. This facility includes school facilities as well as residences for some students. Bancroft was seeking to eliminate some of the residential living facilities for their students and replace it with expanded educational facilities. Our services included the preparation of detailed traffic and parking studies to assess the impact of the proposed program changes and to assess the adequacy of the on-site parking supply. The Bancroft campus is located adjacent to Haddonfield High School which created some traffic conflicts as traffic operations overlapped to some degree. Adequacy of bus stacking for the drop off and pick up of students was also evaluated.
